
SAMPEI – Management of Guaranteed Gas

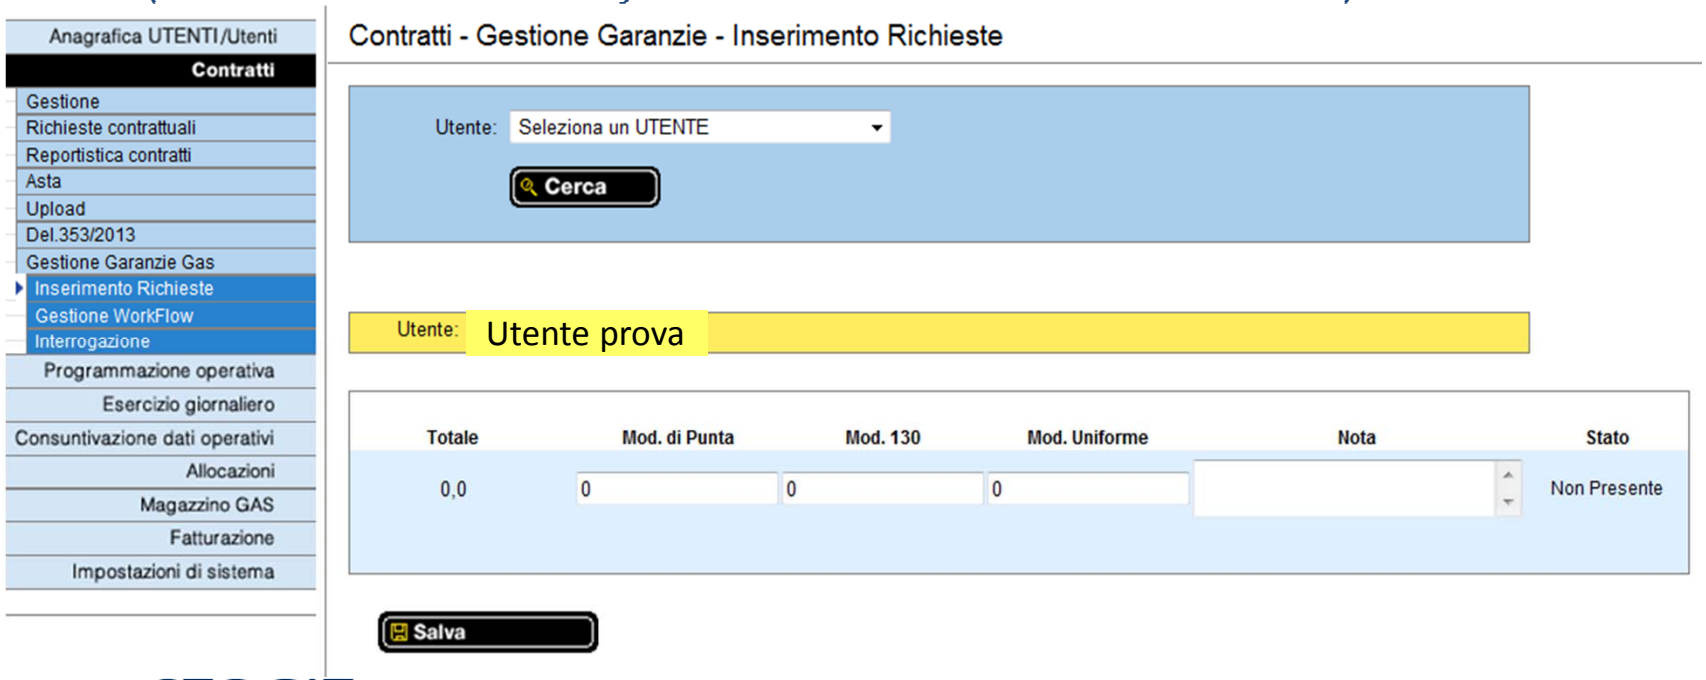
User’s Manual

stogit.it

Creation and modification of Guaranteed gas

In SAMPEI section Contratti > Gestione garanzie gas > Inserimento richiesta, it is possible to enter the quantity of guaranteed gas in favour of the Gas Balancing Responsible, as in paragraph 7.3.4 of Storage Code.

Once the gas quantity is entered, split in the different services available for the User, it is mandatory to click on «Salva».
The Request will be saved only if the mentioned quantities are respecting the storage levels (the nomination of the day is taken in account in this calculation).



STOGIT

Creation and modification of Guaranteed gas

A message will give confirmation of the validity of the request and the buttons «Allega», «Rilascia» and «Annulla» will be available.

Creation and modification of Guaranteed gas

The «**Allega**» button allows the attachment of a PDF document (up to 1 MB).

The «**Annulla**» button allows to cancel a former saved request.

The «**Rilascia**» button makes any request definitive and therefore usable for Stogit.

A released request cannot be modified or cancelled.

A new request will not be allowed before the approval/refusal by Stogit of the already released request.

The approval of the request on behalf of Stogit will be notified by email to the qualified users on Sampei and will be available in Sampei section Contratti > Gestione garanzie gas > Interrogazione.

Report

In section Contratti > Gestione garanzie gas > Interrogazione the User is allowed to:

- check the condition of the request. The date of the query will be the same of the current day.

- Verify the quantity of Guaranteed gas on a certain date.
  By selecting a date and the «accettato» condition, the total quantity of Guaranteed gas will be shown.
